

During the implementation of project 15.3.1.017 „RISK MANAGEMENT FOR LARGE-SCALE INFRASTRUCTURES IN THE ROMANIA-BULGARIA CROSS-BORDER AREA“, two surveys were performed, whose analyses can be seen below:

- [Analysis of the Baseline survey](#) ;
- [Analysis of the Endline survey](#) .

The obtained results prove that the goal of the project, to increase the local awareness regarding risks and benefits from LSI facilities through improved communication, has been reached.
